HELSINKI INTERNATIONAL HORSE SHOW "JUMPS GREEN"

Helsinki International Horse Show has followed a sustainability program since 2017. Like last year, Helsinki Horse Show carbon footprint will be calculated. In the venue we have manure processing partner Horsecoco. All the horse manure is transported to our partner's treatment plant in Tuusula where manure is processed to mulch.

We are committed to reduce and recycle waste at the venue. We choose mainly only eco-friendly materials and we work for green transport choices. We invite all riders and grooms to take part in our project.

Refill water bottles

All grooms will be donated a refill water bottle. Please feel free to use them at the event instead of the disposable bottles. Tap water is safe to drink in Finland. Finnish tap water is fresh and healthy – its quality is among the highest in the world. There we will be a drinking water point in the stable area where all grooms can refill their water bottles.

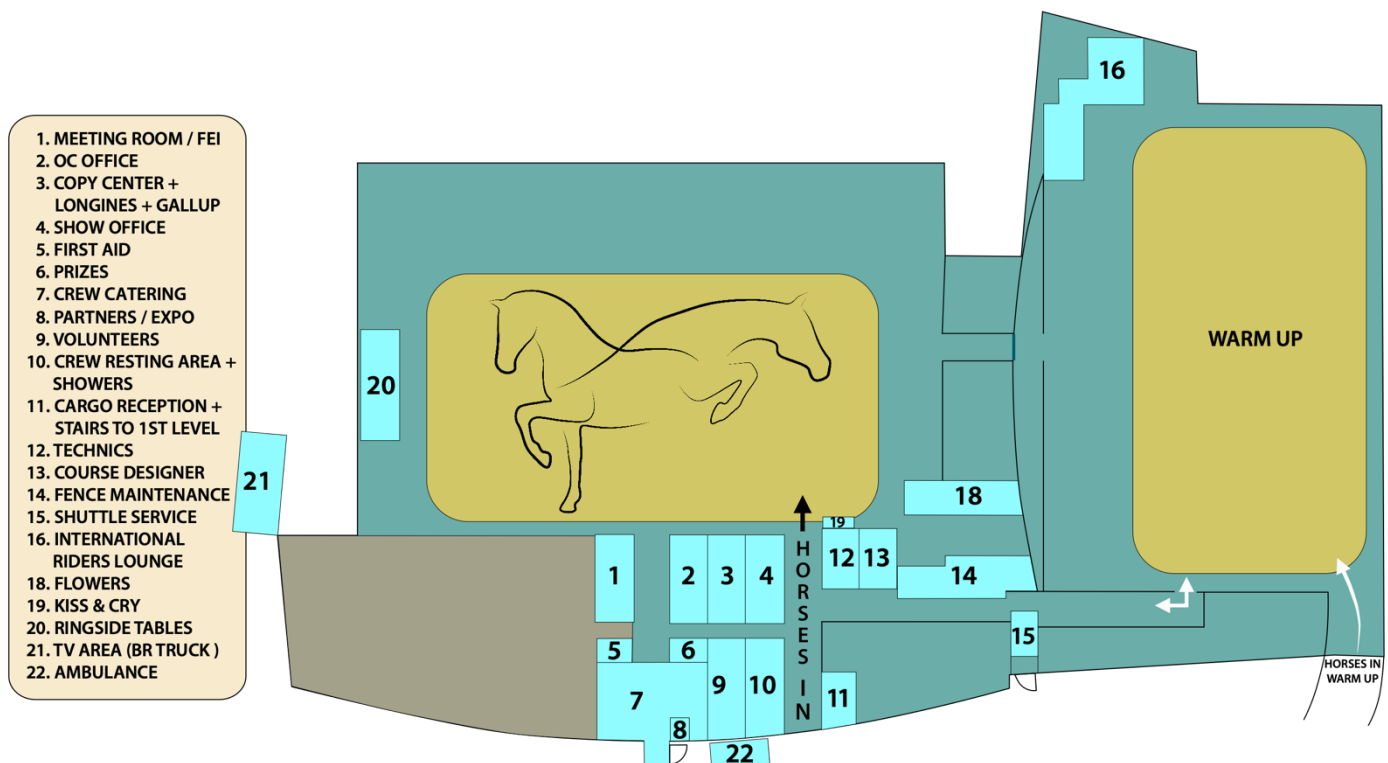

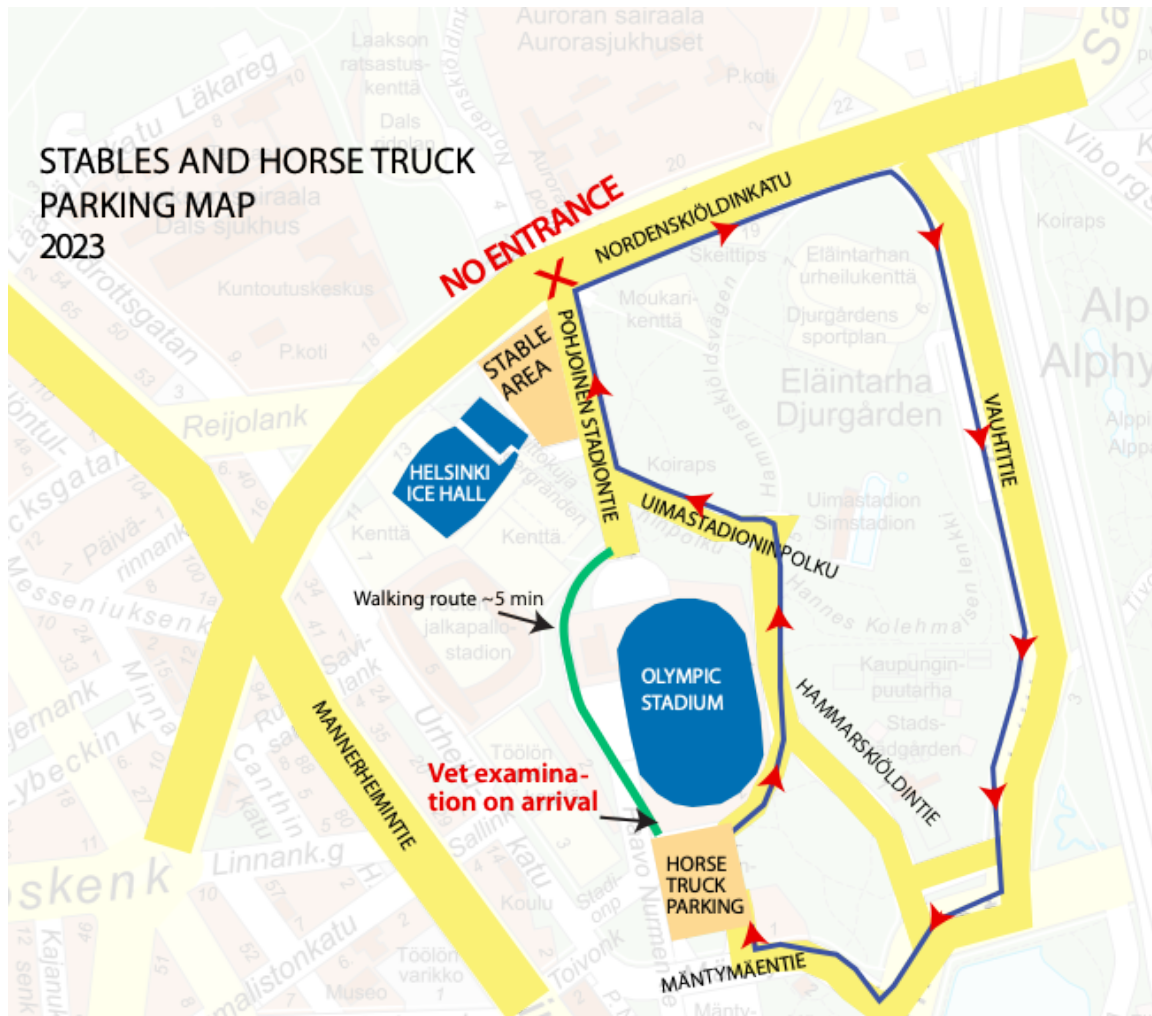

Recycling

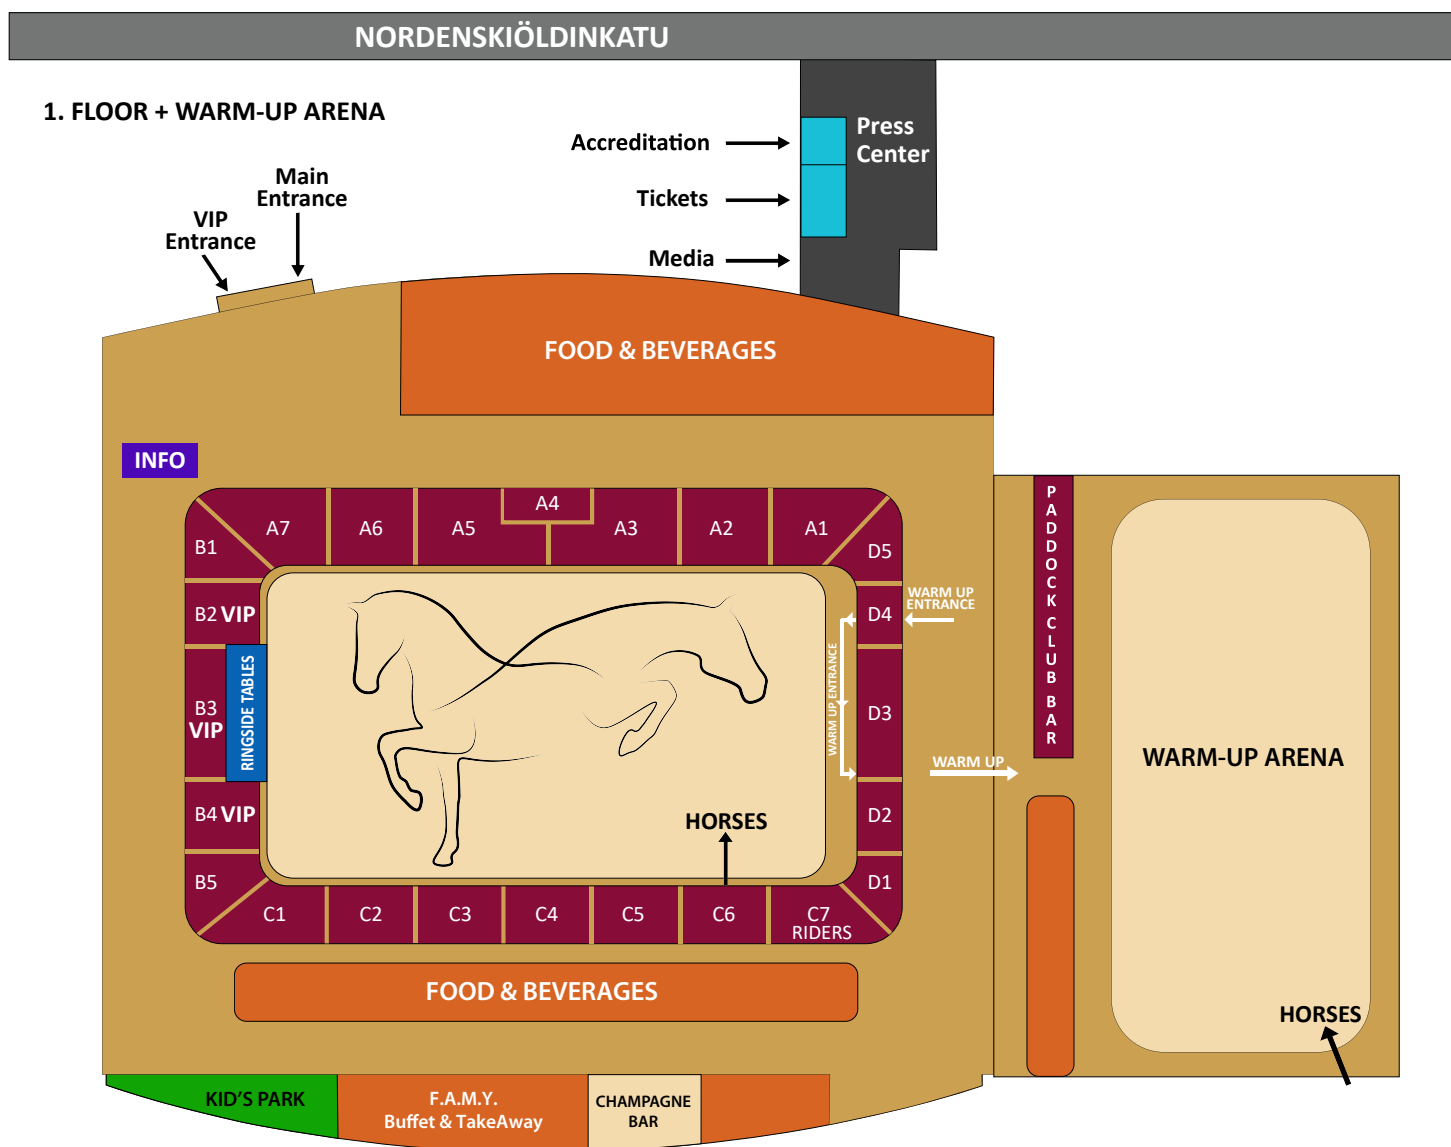

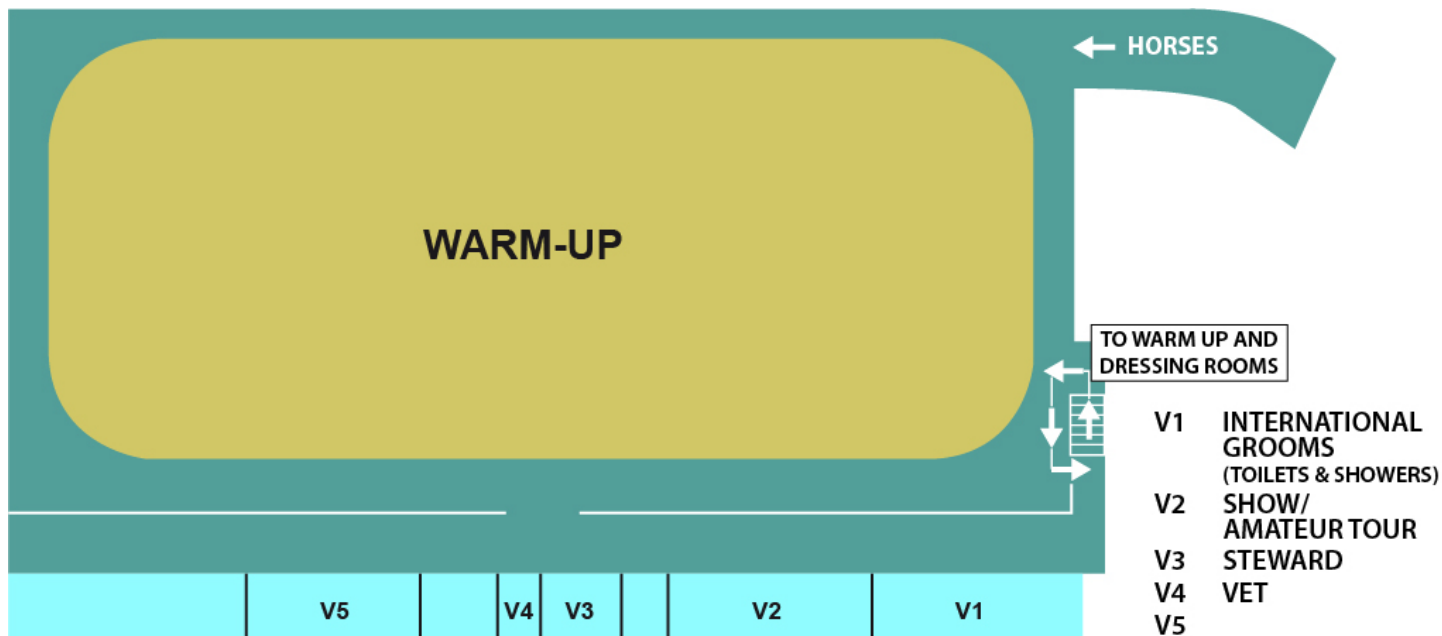

Please notice, that there are waste bins around the venue, stables and horse truck parking area. This year's event will only have organic- and mixed waste bins. The mixed waste will be further recycled at a facility that uses AI for sorting different types of waste. This helps us reach a higher recycling rate than ever before. Please help us keep the area clean!
